Description of Event: Beta Gamma Sigma is hosting its inaugural case study competition at Williamson College of Business on April 8th. How will this event benefit YSU and the student body: This is a unique opportunity for students of all practices to engage in a critical thinking exercise that not only enhances the resume but also assists in strengthening understanding in core concepts learned. It will also distinguish YSU as one of the three state universities that provide this opportunity to local students in Ohio.

~~\$250 for parking (\$5 per person)~~

\$300 for YSU memorabilia (ex. padfolio)

4:10pm – New Student Organization Appropriation Application

Organization Name: YSU Running Club

Actively Registered for: 4 months

Application Date: 2/7/17

Description of Organization: Organized practices for experienced and novice runners. Providing those interested with the opportunity to learn, train, and compete in the sport of running at a post-secondary school level without the obligations or skill required to be a college level athlete.

Purpose/Mission of Organization: The focus of the YSU Running Club will be to promote the sport of running and to provide camaraderie and support for amateur and experienced runners. In addition, it will aim to enhance physical conditioning of the members in order to complement their running skills. The club will support all members in training for races of all lengths.

How will your organization contribute to the enrichment of the YSU community?:

The YSU community has needed an organization like this for a long time. Most students here at YSU once shared a passion for competitive running on the high school track or by running cross country; however, college requires much more from an individual than high school studies and so a lot of previous runners fell out of the sport for various reasons. My organization provides the backbone for getting these students active,

engaged, and interested in a passion they once had. Over the last 3 months my officers and I have amassed a contact list of over 60 individuals interested in the organization. This clearly shows a large interest group in such a short amount of time. I want to see this organization to serve as a pilot light to reignite a flame in each student it come into contact with, and to reengage these students in a sport that can provide in there life as long as they live.

Please list your itemized costs:

\$200 total

(6x) 60-120 lb stretch bands - \$20-\$25 (each)

(12x) field cones - \$15 (per dozen)

(500-1000x) business cards - \$10-\$20 (respectively)

(1x) Duffle bag to carry equipment - \$15

How will an appropriation from the Student Government Association aid your organization in achieving its goals/mission The appropriations will allow us to properly conduct the desired practice events as well as aid us in the recruitment process to better the future of the organization.

Please list all upcoming events and fundraisers your organization has planned for this semester: We are currently planning to hold a restaurant take over at Chipotle near the end of April to raise funds for uniforms/ competition in the fall as well as looking into sponsors to possibly help with uniform costs.

How does your organization plan to increase active membership over the next semester Through active recruitment, campus involvement, and well organized events.

Contact Person: Zackory Goist

Total Number of Members: 13

The suggested appropriation is \$200 for new student organization fee.

How will an appropriation from the Student Government Association aid your organization in achieving its goals/mission?: Appropriations will go towards marketing our club to increase membership and hold events to get the whole university involved.

Please list all upcoming events and fundraisers your organization has planned for this semester: 50/50 at Cleveland Gladiators game on May 5

How does your organization plan to increase active membership over the next semester?: P.A.T.S has a unique opportunity to bring a graduate level degree that does not exist in many other places around this area. Over the years, the conference has grown from 400 to 1,000+ attendees, with more than 80 workshops and 50 exhibitors. Professionals have the unique opportunity to advance their knowledge at Northeast Ohio's premier autism conference. World class speakers present on the most current research-based strategies and behavioral techniques. With more than 80 presentations to choose from, professionals are apt to find content that is a perfect fit for their patients, clients, and students. Beyond the educational opportunity, the conference affords vast opportunities for networking with colleagues and clients.
